**Subject:** Recommendation for Financial Grant of Rs. 1,25,000/- for the Agritech Startup led by Goparaju Karthik.

Respected Sir,

I am writing to highly recommend and support the financial grant request submitted by Goparaju Karthik, a final-year B.Tech student of the Artificial Intelligence & Data Science branch (Batch 2023–2027, Regd. No. 248w5a5404), for his innovative Agritech startup.

At the CSE Innovation Hub, we have closely monitored and evaluated the development of their prototype. The startup operates at the multidisciplinary intersection of Agriculture, Mechanical, Automobile Engineering, and Artificial Intelligence. The team has developed a highly promising prototype that addresses critical automation needs in the agricultural sector.

The proposed budget of Rs. 1,25,000/- has been reviewed by the Innovation Hub committee and is structured as follows:

1. **Rs. 1,00,000/-** for the ongoing development, hardware upgrades, and testing of their functional prototype (cost breakdown verified against their attached budget estimates).
2. **Rs. 25,000/-** for official company registration as a Private Limited (Pvt. Ltd.) entity under Indian terms.

Given the project's technical merit, potential impact, and readiness for transition into a corporate entity, I strongly recommend that the suggested grant of Rs. 1,25,000/- be sanctioned to support their ongoing developmental and registration activities.

Thank you for your support of student-led innovation.

Yours sincerely,

**Ramesh Kumar P.**
