To

Dr. Ravichand M.,
The Registrar,
Siddhartha Academy of Higher Education (Deemed to be University)

Subject: Recommendation and Endorsement for Financial Grant to the Student Agritech Startup.

This is to strongly recommend and endorse the financial grant proposal submitted by Goparaju Karthik, a B.Tech 4th-year student of the Artificial Intelligence & Data Science branch (Batch 2023–2027, Regd. No. 248w5a5404), for his startup project in the Agritech domain.

The recommendation is based on the following key evaluation points:

1. **Multidisciplinary Innovation:** The startup operates at the core intersection of Agriculture, Mechanical, Automobile Engineering, and Artificial Intelligence, demonstrating a unique technical approach to solving modern agricultural challenges.
2. **Socio-Economic Rural Impact:** The proposed prototype utilizes affordable mechanization and AI-driven automation, which directly addresses labor shortages and operational inefficiencies in rural agricultural sectors, positively impacting small-scale farmers.
3. **Financial Justification:** The requested grant of Rs. 1,25,000/- is highly reasonable and strictly budgeted, allocating Rs. 1,00,000/- for prototype development and Rs. 25,000/- for Pvt. Ltd. company registration and incorporation.
4. **High Growth Potential:** The venture has demonstrated high potential to scale. Supporting this project at this juncture will facilitate a smooth transition from a student project into a legally registered corporate entity.
5. **Institutional Alignment:** Fostering such high-potential student-led entrepreneurship aligns with the core vision of our institution. Providing this financial backing will set a benchmark for cultivating startup culture in the department.

Hence, the proposal is strongly recommended for the sanction of the suggested grant.

Yours sincerely,

(Dr. D. Rajeswara Rao)

Professor & Head,
Department of Computer Science & Engineering,
VR Siddhartha Engineering College
