Dr. Ravichand Mandalapu,
Registrar,
Velagapudi Ramakrishna Siddartha College of Engineering

Subject: Request for financial assistance of Rs. 1,25,000/- for prototype development and Pvt. Ltd. company registration of Agritech Startup.

Respected Sir,

I am writing to formally request financial assistance for my startup project. I am Goparaju Karthik, a 4th-year student of the Artificial Intelligence & Data Science branch (2023–2027 batch) with regd. no. 248w5a5404.

Our startup operates in the field of **Agritech**, existing at the multidisciplinary intersection of Agriculture, Mechanical Engineering, Automobile Engineering, and Artificial Intelligence. We are working on an innovative prototype aimed at solving critical agricultural challenges using affordable mechanization and AI integration.

To take this venture forward, I request support for the following two components:

1. **Prototype Development (Rs. 1,00,000/-):** For the ongoing development, hardware upgrades, and testing of our prototype. The detailed breakdown of these costs is attached with this letter.
2. **Company Registration & Establishment (Rs. 25,000/-):** For registering the startup as a Private Limited (Pvt. Ltd.) company under Indian corporate terms. The estimate and details of registration and establishment fees are provided as an attachment.

The total financial support requested is **Rs. 1,25,000/-** (Rupees One Lakh Twenty-Five Thousand Only).

This support will be critical in enabling us to finalize our prototype and transition into a registered corporate entity. I have enclosed the detailed bills, breakdown of costs, and registration fee estimates for your kind perusal.

Thank you for your continuous encouragement and support. I look forward to your positive response.

Yours sincerely,

Goparaju Karthik
